Say No to Dirty Air!

Say No to the HECA Coal Project

SCS Energy wants to build a massive \$4 billion dirty coal-powered chemical facility near Tupman and Buttonwillow. If approved, the project would emit dangerous pollution into Kern County's air.

According to the American Lung Association, Kern County already has the dirtiest air in the nation! We can't afford another dirty project that will add more pollution.

Tell the California Energy Commission & U. S. Department of Energy to reject the HECA project and to protect our health!

**ATTEND THE PUBLIC WORKSHOP
AND SPEAK OUT FOR CLEAN AIR!**

Tuesday, September 17, 2013. 6PM

**Buttonwillow Recreation and Park District
Multi-Purpose Facility, 556 Milo Avenue**
