

Frontlines of Environmental Justice Fall 2026

Stop Proposed AI Data Centers in Our Neighborhoods!

Greenaction is helping residents of Hanford and Lemoore in California's Central Valley, San Francisco residents, and Quechan Indian Tribe members in campaigns to defeat giant proposed AI data centers. Residents are concerned about air pollution, energy and water use, and heat from data center projects. On August 28th, Greenaction co-sponsored and spoke at a town hall meeting in Hanford to educate and mobilize residents against data centers proposed at the Lemoore Naval Air Station and Kings Fair Grounds. We recently learned of a large data center proposed in San Francisco, and Greenaction has joined the fight.

All Hands on Deck to Defend the Health and Safety of Bayview Hunters Point & San Francisco Bay From Radioactive and Toxic Waste

Toxic and radioactive waste at the Hunters Point Naval Shipyard Superfund Site continues to poison residents and the environment, while the Navy tries to cover it up. On June 24th, Greenaction and the Marie Harrison Community Foundation mobilized 29 groups and more than 150 people on the steps of City Hall to demand retesting and a full cleanup of contamination with full community oversight, and health reparations for residents harmed by the pollution. The Navy's cleanup plans would leave toxic and radioactive waste buried along the shoreline where San Francisco plans a massive redevelopment project, putting the current and future resident's health at extreme risk.

Stop Pollution from the Avenal Regional Landfill! Community Meeting Set for October 28th!

Greenaction and residents continue to organize and advocate for stronger regulatory oversight and enforcement against pollution violations at the Avenal Regional Landfill in this farmworker town in California's Central Valley. Residents are outraged about air pollution, noxious odors and diesel truck traffic. We are holding local, regional, and state regulatory agencies accountable, and we are organizing a big community meeting on October 28th. Every day, hundreds of trucks dump garbage and contaminated materials at the landfill located next to low-income housing and community businesses. The fight is on!

As Trump opens Bears Ears National Monument to uranium mining, White Mesa Utes, Greenaction and allies mobilize for October 17th Spiritual Walk and Protest against Energy Fuels' mill/dump and mines!

Greenaction is working with White Mesa Utes to mobilize Indigenous people and allies across the Southwest US to come to the White Mesa Ute Community in southern Utah October 17th for the 10th Annual Spiritual Walk and Protest against Energy Fuels' uranium mill/dump and mines. As Trump just reduced the Bears Ears National Monument by 90% to allow uranium mining and oil/gas operations in this beautiful area sacred to many Tribes, we are escalating the fight for environmental justice and protection of sacred and culturally significant landscapes.

No ICE! No Wars for Oil! Defend Democracy!

Greenaction's Know Your Rights vs ICE educational outreach has successfully reached hundreds of people in Bayview Hunters Point and Tenderloin communities in San Francisco, and we continue to expand our efforts. On September 8th we conducted a Know Your Rights training for diverse residents, including many immigrants, in Bayview Hunters Point. Our multilingual outreach team shares key resources on how to report ICE activity and understand your legal rights if confronted by or observing ICE and their masked agents. Our communities are under attack, and we must understand how to protect ourselves and each other. Greenaction will continue to speak out against Trump's authoritarian and racist assault on democracy, justice, communities, immigrants, workers, our planet and environment. Silence is not an option!

Our Power Up for Justice YouTube Series Brings You Along to the Frontlines of Environmental Justice

"Power Up for Justice" is our new YouTube series powered by the knowledge that the environmental justice movement, from its very beginnings, has a rich history of struggle and victories for health and justice. Subscribe to our YouTube channel

@GreenactionforJustice to find the latest episodes of interviews with community leaders, campaign action footage from protests, community meetings, and historical archival materials from the early days of the environmental justice movement. It is critical we understand and harness the power of successful community organizing!

Stop Toxic Facilities Next to Schools!

We responded to a request for help from neighbors and parents of kids who go to elementary school next to the Cepheid facility in Newark, California. The company wants permits to increase toxic emissions.

Greenaction Supports the Fight for Safe Battery Energy Storage in Watsonville, and Beyond!

Greenaction fights for a Just Transition away from fossil fuels, without false solutions to climate change that continue patterns of environmental racism, perpetuating harm onto our communities. We are supporting the Watsonville community in their fight against the Lithium Battery Storage system proposed next to affordable housing with mostly Spanish speaking residents. We support the residents' health and safety concerns and the call for NO lithium BESS facilities in neighborhoods!

URGENT! GREENACTION NEEDS YOUR SUPPORT! DONATE TODAY!

Please support Greenaction with a donation to keep us on the frontlines in campaigns for environmental, climate, social, economic, and racial justice!

We will never sell-out or compromise! We rely on supporters like you to sustain and grow our frontline work in communities far and wide. Times are challenging now, and we ask for your support today!
